DETAILED ACTION

Applicant's Amendment filed 07/25/05 has been entered and carefully considered. Claim 1 has been amended. New claim 5 has been added. Claims 2, 4-5 are allowable over prior art of record, however, limitations of amended claim 1 have not been found to be patentable over prior art of record, therefore, claims 1 and 3 are rejected under the new ground rejections as set forth below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Batch (5709003).

With regard to claims 1 and 3, Batch discloses a scrubbing device comprising a first set having a first handle (16) and a first scrubbing stick (40) connected to a first end of the first handle, a recess (18) defining in the first handle and communicating an opening defining in a second end of the first handle and a second set (20) having a second handle (28) and a second scrubbing stick (22) which is connected to a first end of the second handle, with the second handle being sized and shape for slideable

Art Unit: 3732

engagement with the recess (fig. 2), with the second set being sized and shape allowing removal of the second set from the recess, allowing the second scrubbing stick to be received in the recess while the second handle is engaged with the recess and inherently allowing the second scrubbing stick to be outside the recess while the second handle is engaged with the recess. The device further having a knob (30) being connected to a second end of the second handle and extending beyond the second end of the first handle. Applicant is noted that all the claimed structure have been shown, the intended use is given no patentable weight.

Claims 2 and 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kozak is cited to show the state of the art with respect to a tool having two implements at opposite ends.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
